

The Composite Flood Defender Door

The Flood Angel Composite Flood Defender Door is the first of its kind in the UK.

Its unique monocoque, double rebate, high strength structure, state of the art locks and superior quality seals give it unrivalled flood protection qualities.

In addition, the Composite Flood Defender Door also boasts an outstanding average U-Value of 0.64; an 'A' energy efficiency rating; triple glazing in a range of glass options and a choice of 10 attractive woodgrain colour finishes.

Selecting Door Side Panels

Side panels are available for all door styles. Moulded or plain bottom panels are available in white or to match door colour. Full length or half glass side panels are available to match door glass.

Moulded Panel

2. Choose your door colour

White	Cream	Red	Blue	Bog Oak
Green	Light Oak	Rosewood	Chartwell Green	Anthracite Grey

Door frames are available in white finish as standard. They can be colour matched to the door/side panels at an extra cost.

3. Choose your door furniture

Choose from gold, chrome, black and white.

STEPS to choosing your door

Choosing your Composite Flood Door

The advantage of the Composite Door range is its flexibility. Whilst every door has been designed to provide superior flood protection, customers can personalise their finished look by combining door style, glass choice, side panels, door furniture and colour to suit their individual property.
