

WASTOP® RESIDENTIAL HOME FLOOD PREVENTION

COMPLETE PROTECTION

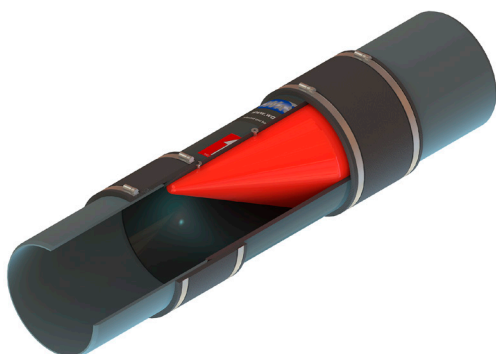

WaStop allows a pulsating flow through the valve keeping the pipes clean and unclogged

When there is no flow the valve is completely closed, protecting your home from backflow.

EASY INLINE INSTALLATION

PROVEN

USED IN MUNICIPAL AND
RESIDENTIAL APPLICATIONS
SINCE 2000

PEACE OF MIND WITH WASTOP®

Protect your home with WaStop Residential Series.

During flood events the sewer system can become overloaded and the point of least resistance becomes an emergency outlet for the sewer. This point can be in a basement or ground floor in low lying homes, through the toilet, shower, drain or hand basin.

WaStop Residential protects your home from flooding and backflow caused by overloaded sewers. WaStop Residential also helps protect your insurance premiums by reducing claims.

WaStop Residential gives you Peace of Mind.

THE BENEFITS OF WASTOP®

- Easy installation - no gluing or levelling
- Pulsating flow minimizing the risk of clogging
- Unique **heavy duty memory membrane**
- **No moving parts** - virtually maintenance-free
- Stops liquids, odours, insects and small animals
- Peace of mind - stops flooding effectively
- The market leader - driving innovation
- **CE Approved** for use in residential applications
